

Canbeyli Construction

RESIDENTIAL, COMMERCIAL AND TURNKEY PROJECTS

We develop residential and commercial buildings by reading the land, the need and the user at the same table.

A construction approach that builds lasting connections between people, environment and function. We consider development, design decisions and construction together.

WHAT WE DO

- Residential and commercial development
- Land and development partnerships
- Plans, technical scope and visuals in the project archive

WHAT HELPS A FIRST MEETING

- For a home or commercial space: intended use, preferred location and timeline
- For land or a partnership: the location, existing documents and what you expect from the partnership
- The name of the project you are interested in

Features of one project are not common features or guarantees for all projects; delivery scope is defined in each project's written documents.
